Unit 2 Math Journal Prompts

1) When you look at an input/output tables, what strategies do you use to identify the numbers and operations in the machine?

2) What is one advantage of using a variable to represent a pattern? How does this help you solve a problem?

3) How is plotting a point on a coordinate grid similar to plotting a point on a number line? How are they different?

4) What did you learn in the last math class? Be the teacher and explain the math concept to a classmate that was missing.

5) What did you find difficult and why? What did you do to help yourself?

6) Solve a word problem from one of your textbook pages. (Confirm the question with Mrs. Syme before starting)
